Subject: Two items for you to be ready for this Friday

First of all, welcome back!

Here are the two items:

1. There is a meeting Friday afternoon with DTSC and South Coast at 1 pm in the Navajo Nation room regarding Exide. You should attend and I'll tell Lornette she does not have to attend in your place. Mohsen called the meeting b/c he wants to make sure everyone is on board with the closure of the facility and what is going to happen. Enforcement has the lead of the NESHAP applicability determination, and Laki has decided to move ahead and propose the permit and not wait for our determination. I plan to either come in or call in tomorrow. Debbie/Elizabeth will be joining late into the call. Matt will be there at the start of the call and Amy Z. will be calling in. Enforcement and Land Division will also be in attendance as they each have their respective roles on this. Laki told me that they expect to send us the draft permit by end of the month (as you have told me previously). Let's talk in the morning when you come in.

2. I need the name of the tribe that commented on the GDF general permit. A tribe in SCal

wants to know. They seem to have the same concern. There are a bunch of emails floating around. Apparently, Laura McElvie and Chris Stoneman have also either emailed or talked to her. I talked to her and explained what we are doing and how we are not implementing state law, rather we are implementing the requirements of the tribal NSR rule. She did not realize that our reg actually requires us to look at surrounding non-attainment areas. She will be talking with her tribal chair and council about this to see if they want to do anything further. She seems to understand that an individual source specific permit will likely have the same result as the general permit, only it would go faster.
